EXPERIENCE

OurFreedom.ai • New York City, USA

Jan 2026 – Jun 2026

Full-Stack Engineer (Tech Lead, Mobile + Backend)

- **Tech lead on both halves of the platform** — NestJS + MongoDB backend (~40 modules) and React Native + Expo iOS/Android app; maintainer/reviewer on both repos with 110+ commits since January.
- **Designed and shipped a two-track release pipeline** combining Expo OTA on iOS+Android, Google Play in-app updates, App Store deep-links, and a backend force-update protocol, orchestrated through useAppUpdate + useNativeVersionCheck hooks; runtime-fingerprinted OTAs and channel-pinned publish scripts prevent local .env values from leaking into production bundles.
- **Built end-to-end sensitive-image moderation:** NestJS module backed by AWS Rekognition + S3 staging lifecycle, plus a custom iOS Swift native module wrapping Apple's on-device SCSensitivityAnalyzer; hybrid device-first / backend-fallback policy with SHA-256 caching, live across posts, profiles, uploads, and physical mail.
- **Shipped the Direct Messaging subsystem** — extended dm/conversations with a ConversationReport entity, four endpoints, per-user unread aggregation, and a mark-as-read API; rebuilt the client around dynamic 1:1 + group DMs, adaptive polling, blocking, reporting, global search, typing indicators, and unified post sharing.
- **Owned iOS release hardening and trust layer** — age-verification gating (US-state resolution, declared-age-range entitlement), Apple Sign-In hardening, TestFlight/URL-scheme alignment, hardened expo.extra env allowlist, Stripe bootstrap, AdMob with SKAdNetwork+ATT, and operator runbooks for every release path.
- **Rewrote the username/handle system** across social/profiles and social/follows on the backend (~200 LOC of schemas, DTOs, controllers, services), with matching report-profile, block, search, and handle UI on mobile.

ACN Fiber Pvt Ltd • Mumbai, India

Jun 2023 – Jul 2024

Software Developer

- Built and deployed Express.js REST APIs integrating third-party telecom services, scaling to 10,000+ daily users and powering real-time customer data flows across multiple software modules.
- Standardized request/response contracts and error-handling patterns across endpoints, improving maintainability and cutting on-call debugging time for the team.

PROJECTS

Lumina — AI Compliance Q&A Assistant (Graduate Team Project)

Sep 2025 – Dec 2025

Next.js · React · TypeScript · FastAPI · LangChain · FAISS · OpenAI GPT-4o-mini

- Built an end-to-end retrieval-augmented compliance Q&A pipeline: PDF upload → chunking → embeddings → FAISS vector search → top-k retrieval → prompt assembly → source-cited answers in the UI.
- Hardened retrieval with cosine-similarity normalization, fuzzy matching for non-exact queries, and a migration off deprecated LangChain chains onto a modern runnable sequence; added context caps + fallbacks to eliminate empty/repetitive responses.

Fund Flow — Full-Stack Personal Finance App

Aug 2024 – Dec 2024

React · Next.js · Redux · Node/Express · MongoDB · Gemini 1.5 · ECharts · i18next

- Shipped a full-stack expense, budget, and shopping-list manager with end-to-end CRUD over RESTful APIs, organized around Domain-Driven Design and an interactive ECharts dashboard.
- Integrated a Gemini-1.5-Flash AI assistant for financial insights, plus real-time collaboration via Fugu and automated alerts via EmailJS; multilingual via i18next.

EDUCATION

Northeastern University, Boston, MA

Sep 2024 – Dec 2026

M.S. in Information Systems · Coursework: Web Development, Prompt Engineering, Program Structures & Algorithms, System Design, Database Management, UI/UX

University of Mumbai, Mumbai, India

Jun 2020 – Jul 2023

B.Tech in Electronics and Telecommunication Engineering

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Swift, Java, C++

Mobile / Frontend: React Native, Expo, EAS, iOS Swift native modules, Android in-app updates, expo-updates / OTA, React, Next.js, Redux, Tailwind

Backend / Data: NestJS, Node.js, Express, FastAPI, REST API, JWT, WebSockets, MongoDB, MySQL, Firebase, Redis, FAISS

Cloud & AI: AWS (S3, Rekognition), Stripe, Twilio/Telnyx, Lob, GitHub Actions, OpenAI, Gemini, LangChain, RAG, prompt engineering
